

EVOLINE, PORT 3 SOCKET UK IN STAINLESS STEEL

- Max. worktop thickness 50 mm
- Mounting hole Ø 102 mm
- Power cable with grounded plug
- Origin: Germany

Just let the junction boxes, plugs and cables disappear into the recess. When the **EVOLINE®** Port is closed, only the frame, the cover and the emerging cables can be seen.

The patented rocking cover is on the one hand a handle and on the other hand a kink protection for the cables. The high-quality aluminium housing of the **EVOLINE®** Port can be easily pulled out by tilting the lid. Gentle pressure causes the electrification module to disappear into the cavity that provides space for most commercially available plugs. The rocking cover leaves space for the cables.

This popup socket tower can be built into virtually any worktop or cabinet. Ideal for offices, kitchenettes, showrooms, and everywhere where designing, and exhibition is significant.

Three **power sockets**, housing aluminium, rocking cover, and collar are **silver plastic**
