ø 124 mm

G (UK)

certifications

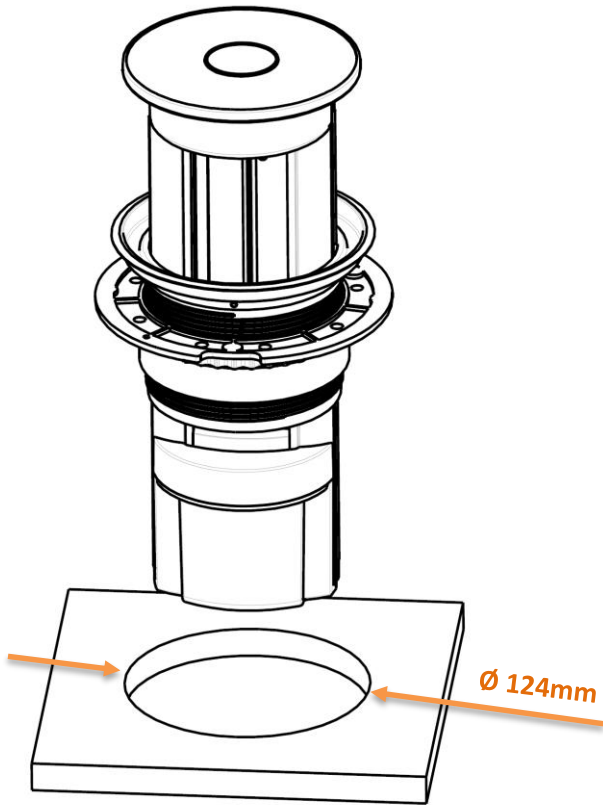

The VersaElite module embraces a high standard of technological development, with a concealed system bringing electric to kitchen worktops, executive desks and workstations. Expose the sockets as and when required and then push it down freeing up workspace. Gentle pressure can be applied to release/pop up the locking system: Versa Elite, can then be drawn into position by hand. A factory fitted rubber seal prevents water infiltration: it can be used on every worktop.
